Corning® Varioptic® C-S-25H0-096 Auto Focus Lens Module

Overview
The Corning® Varioptic® C-S-25H0-096 auto focus lens module integrates a fixed lens module with a Corning® Varioptic® A-25H0 variable focus lens in an M12x0.5 receptacle (S-mount). The C-S-module has an FPC cable and can be connected to a standard 1 mm pitch FPC connector. It can be easily integrated in a standard M12 sensor board. The C-S-module is compatible with most imaging sensor formats, from 1/4” to 1/1.8”. This C-S-module can be controlled by the same drivers as the A-25H0. For more information on this module, please refer to the C-S-25H0-096 Technical Datasheets (TEDS).

Ordering Information
- **Corning® Varioptic® C-S-25H0-096-03 auto focus lens module**: 4-pin, 1 mm pitch bent flex cable (FPC-A-3) without IR-cut filter.
- **Corning® Varioptic® C-S-25H0-096-03I auto focus lens module**: 4-pin, 1 mm pitch bent flex cable (FPC-A-3) with IR-cut filter.
- **Corning® Varioptic® C-S-25H0-096-07 auto focus lens module**: 4-pin, 1 mm pitch straight flex cable (FPC-A-7) without IR-cut filter.
- **Corning® Varioptic® C-S-25H0-096-07I auto focus lens module**: 4-pin, 1 mm pitch straight flex cable (FPC-A-7) with IR-cut filter.

Performance Summary
- Effective focal length: 9.6 mm
- F number: 3.7
- Image circle diameter: 9.1 mm
- Focus range: 7 cm to infinity

Example of Applications
- Industrial cameras
- Medical imaging
- Biometrics
- Machine vision
- Industrial endoscopes

**Notes:**

1. For more information on the behavior of the A-25H0 lens with voltage, please refer to the A-25H TEDS.
2. For a sensor size of 1/1.8”.
3. For shorter focusing distances, see “Module Setting Recommendations”.

### Electrical Specifications

#### Electrical Connection

![Electrical Connection Diagram]

The following FPC connectors are compatible with the FPC tip:

- SFW4S-2STE9LF from Amphenol FCI
- 04FMN-BTK-A (LF)(SN) from JST

#### Driver

Several drivers have been qualified for use with Corning Varioptic variable focus lenses (See A-25H Data Sheet). The customer should choose the driver depending on its application. It is important to check the resolution of the driver compared to the depth of field of the system. See driver datasheets for more details.

Module Setting Recommendations

Use caution when configuring the initial lens module settings. Although the user has complete control over module configuration settings, only a limited number of configurations will provide optimum image quality.

Setting Procedure Without Voltage:

Here is a simple procedure to set the C-S-25H-096 module for a 7 cm to ∞ usage:

1. Set a scene at a distance of at least 5 m from the camera.
2. Insert and slightly screw the C-S-module on the M12 camera lens holder (C-S-module unpowered).
3. The image should be out of focus.
4. Screw the C-S-module clockwise until the center of the image becomes sharp.
5. From this position, screw the C-S-module clockwise an additional 2 turns with accuracy of ± 1/4 turn: the image becomes out of focus again.
6. Fix the C-S-module in this position.
7. Power the C-S-module: the infinite focus will be obtained for V∞ and the focus at a closer position will be obtained by applying a higher voltage, up to Vmax.

To use the C-S-25H-096 module for a maximum focus of distance x0, modify the above steps:

1. Set a scene at a distance of x0 from the camera.
2. Power the C-S-module: the focus at x0 will be obtained for V∞ and the focus at a closer position will be obtained by applying a higher voltage, up to Vmax.
   
   With this setting, the minimum object distance is reduced from 7 cm to:

   \[
   \frac{1}{14 + \frac{1}{x_0}}
   \]

   in meters, with x0 in meters.

Setting Procedure with Voltage:

1. Connect the C-S-module to the driver and adjust the voltage control to 39.5 Vrms.
2. Turn on the camera, and point the camera in the direction of a scene that is at least 5 m from the module, or at a distance of x0 if using at the maximum focus distance x0.
3. Screw the C-S-module clockwise until the image becomes sharp.
4. Optional: Block the C-S-module in that position.

Corning reserves the right to change its product specifications at any time without notice. Please ensure you have the latest applicable specification before purchasing a Corning product. It is customer responsibility to determine the suitability of Corning’s product to its own application. Corning does not provide any warranty of merchantability or fitness for a particular purpose.
